

# Summary of the Experiment

Your Subject ID is \_\_\_\_\_.

## To summarize,

- Each round will proceed as follows:
  - Role is determined as BLUE or GREEN
  - Make a choice
  - Points earned in that round are determined
  - Outcome is shown.
- Next, we explain how your role is decided.

## Role determination

- Whether you become BLUE or GREEN in each round is determined by a computer program.
- Your choice nor your counterpart's choice will effect the determination of roles.
- You may be in one role throughout the experiment, or your role may change once in several rounds.

## Flow of each round

- Possible choices depend on the role your are in:
  - If BLUE, you choose from "N" and "S".
  - If GREEN, you choose from "W" and "E".
- Each person in each role chose one from the two alternatives.

## Flow of each round

- Points earned in each round depend on the role and the choices made.
- For example, if you are BLUE and chose "N", and your counterpart chose "W":
  - You will earn BLUE's points corresponding to choices "N and W".
  - Your counterpart will earn GREEN's points corresponding to choices "N and W"
- Points earned for a pair of choices by BLUE and GREEN does not change during the experiment.

## Caution on the time limit

- As we have explained, choice screen and outcome screen change every 10 seconds.
- If you do not make a choice within 10 seconds in the choice screen, you will earn 0 points in that round.
- Make sure to decide within the time limit.
- In the next slide, we will explain about the payment.

## Points earned and the calculation of payment

- First, the total sum of points earned in all rounds are exchanged with rate  
**1 Point = 5 Yen.**
- 500 Yen participation fee is added to this.
- Thus, your earning is:  
**Payment based on points+Participation Fee 500Yen**
- **The outcome in every round** directly effects your payment. The more points you earn, the more earnings you will get.

# Understanding Test

For each sentence below, (1) if it's correct, circle the number, (2) if it's wrong, fix the sentence so that it is correct.

1. Your counterpart changes every round.
2. The points you earn when your role is BLUE and some pair of action (for example "N" and "E") is chosen, is the same as the points your counterpart will earn when their role is BLUE and the same pair of actions ("N" and "E") is chosen.
3. The points your counterpart will earn when your role is BLUE and some pair of action (for example "N" and "E") is chosen, is the same as the point you will earn when your counterpart's role is BLUE and the same pair of action ("N" and "E") is chosen.
4. There is no time limit when you make a choice.
5. Your earnings will be calculated based on the total sum of points you earn in all rounds.

**This is all with the understanding test. Please raise your hand when you have finished.**
